Immaculate Conception Accessibility Plan

Our school completed the School Physical Accessibility Audit Checklist in 2023 by:

- Kathleen Barth, Principal
- Ron Walsh, Maintenance
- Cheryl Hanley, LRT (Former LRT teacher)

This team has identified the following as goals for greater accessibility for all individuals at our school. We have set these as goals for the following two years.

- Paving from the playground to the bridge areas (Completed August 2023)
- Replace all knob handles to levers in the school (Completed August 2025)
- Providing greater accessibility to the garden area (flower beds at varying heights, sensory pathways, paved pathways for greater access for all students) (Received Imagine Grant to help support this project. Project completed June 2025)
- Additional accessible parking spots in front of school (Completed May 2024)
- Change fluorescent lighting in each classroom (Ongoing project. The following classes have been completed Grade 3, 4, 5, 6,7)
- Ramp at the main entrance and at other appropriate entrances (Completed)
- Discussions/quotes for bars on church exterior doors (ongoing)
- Replacement of playground structure to a structure with more accessible access points for students
