

June 1-5, 2020

Kindergarten

Weekly Newsletter

This week we are going to begin looking at the forces of push and pull. Take the time to investigate when we push and pull during play. We are also going to be learning more about 2D and 3D shapes, point out to your child the many 3D shapes you see in your environment.

Core Curriculum

- Make exploratory observations using their sense.
- Demonstrate curiosity and a sense of wonder about the world.
- Develop, demonstrate and apply mathematical understanding through play, inquiry and problem solving.

Important Dates and Class Meetings on Zoom

All Zoom classes this week will be done individually.

Show and Tell:

There will be no show and tell this week.

Core Competencies: (Communicating, Thinking, Personal and Social)

- Students communicate in order to collaborate.
- Students communicate in order to share and build on another's creative ideas.
- Students use critical thinking to generate new ideas to solve problems and constraints that arise as they design and develop.
- Students identify their personal strengths and abilities to self advocate effectively.
